

Product Release

5/1/07

San Rafael, California ... Stage 8 Fasteners Inc.

Contact: Robert Ahern or Glenn Thompson: 415 485 5340

For Immediate Release:

Stage 8 Fasteners continues its 100% success rate, 20 years no failures, with their line of locking header bolts. Automotive enthusiasts and racers are not only discovering that **Stage 8 Locking Header Bolts** easy to use but they are absolute insurance against horsepower loss or gasket failure created by loose nuts or bolts. The unique patented and trademarked functional design is just three pieces: a bolt (4130 Alloy Steel), a locking retainer and a spring clip or, depending on the application, a nut, a locking retainer and a spring clip. The bolts are application specific as either hex head with a 3/16 recessed allen head or 12 point, both come in multiple lengths. **Stage 8 Locking Fasteners** are also available in custom sizes and materials by special order.

Critical parts are easily secured. Vibration, stress conditions, and constant wide temperature swings will no longer loosen vital components. As an example, no more loss of horsepower caused by leaking exhaust manifolds or headers or collectors; no more oil leaks from valve covers or oil pans. **Stage 8 Locking Fasteners** has fitments for most popular domestic and import vehicles and are available in an extensive list of application specific kits.
